## **DETAILED ACTION**

### ***Specification***

The disclosure is objected to because of the following informalities: On page 4, line 8: the term "heart" is misspelled and should read - - heat - -.

Appropriate correction is required.

### ***Information Disclosure Statement***

The information disclosure statement filed on 02/27/07, 01/11/2007 & 01/10/2007 fails to comply with 37 CFR 1.98(a)(1), which requires the following: (1) a list of all patents, publications, applications, or other information submitted for consideration by the Office; (2) U.S. patents and U.S. patent application publications listed in a section separately from citations of other documents; (3) the application number of the application in which the information disclosure statement is being submitted on each page of the list; (4) a column that provides a blank space next to each document to be considered, for the examiner's initials; and (5) a heading that clearly indicates that the list is an information disclosure statement. The information disclosure statement has been placed in the application file, but the information referred to therein has not been considered.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kawakubo (6,827,139) in view of Higashiyama (2008/0296003). Kawakubo discloses a heat exchanger apparatus comprising a plurality of tubes (110), a plurality of fins (120), a top and bottom headers (140), and tank plates (171,172). Kawakubo discloses outflow openings but fail to mention guides. Higashiyama teaches guides and directing refrigerate flow. It would have been obvious to one having ordinary skill in the art at the time of the invention to modify the disclosed apparatus with guides for the mere purpose of directing refrigerate flow within a heat exchanger apparatus.

***Allowable Subject Matter***

Claims 2-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***
